ABC Assurances — Fictional Claims Procedure (Form C-200)

Document ID: ABC-POL-CLAIMS-2026-001 Version: 1.3.0

Effective date (fictional): 2026-01-01

FICTIONAL DOCUMENT — FOR EDUCATIONAL USE ONLY
ABC Assurances is a fictional insurer. This policy text is invented for software and RAG training demos. It is not legally binding and must not be used for real underwriting, claims, or compliance decisions.

ABC Assurances Claims Procedure (Form C-200)

Form C-200 describes how fictional policyholders report and resolve claims with ABC Assurances. It applies to **Form H-100** (home) and **Form A-300** (auto) unless a policy section states otherwise. This document is for educational RAG training only and has no legal effect.

1. Purpose and Scope

1.1 Form C-200 standardizes reporting, evidence collection, investigation, decision, payment, and appeals for property and automobile claims.

1.2 **Catastrophe protocol CP-9** may supersede timelines when a provincial catastrophe is declared by ABC Assurances' fictional Cat Desk.

1.3 **Privacy.** Personal information is handled under fictional Privacy Standard ABC-PRIV-3 for demo datasets.

1.4 **Emergency.** For injury or ongoing danger, insureds must contact emergency services before calling ABC Assurances.

2. Reporting a Claim

2.1 **How to report.** Use the fictional portal claims.abc-assurances.edu, phone 1-800-ABC-DEMO, or in-app messaging when enrolled in ABC Digital (fictional).

2.2 **Timelines.**

2.2.1 **Property (H-100):** notify within 7 days of discovery; water losses require initial notice within 48 hours recommended for mitigation credit under H-100 Section 6.2.

2.2.2 **Automobile (A-300):** notify within 7 days; hit-and-run within 24 hours for uninsured motorist property damage (A-300 Section 7.7).

2.3 **Information at first notice (FNOL).** Policy number, date of loss, location, brief description, contact details, whether police or fire attended, and whether anyone was injured.

2.4 **Claim number assignment.** Format CLM-YYYY-NNNNNN issued at FNOL; this number must appear on all subsequent correspondence.

2.5 **Cross-policy losses.** When home and auto are involved (e.g., garage fire with vehicle), a single **master claim** MC- prefix may link files; adjusters coordinate per Section 5.4.

3. Evidence and Documentation

3.1 **General list.**

3.1.1 Photographs or video of damage before permanent repairs.

3.1.2 Repair estimates from licensed vendors (fictional registry VR-12).

3.1.3 Receipts for emergency mitigation (tarps, dry-out, towing).

3.1.4 Police report when theft, vandalism, hit-and-run, or injury occurs.

3.1.5 For water claims, plumbing invoices and appliance serial numbers if sudden discharge is alleged (H-100 Section 5.2).

3.2 **Foundation and sudden water disputes.** Engineering report **ER-FND** within 15 days when invoking H-100 Section 5.3.3.

3.3 **Auto collision.** Photos of all vehicles, driver licences, insurance cards, witness statements, and dash-camera footage if available.

3.4 **Proof of ownership** for high-value personal property items over $5,000.

3.5 **Sworn proof of loss** form PPL-100 required before final payment on property claims exceeding $25,000 fictional threshold.

3.6 Insureds must not dispose of damaged property until authorized, except for health and safety mitigation documented in the claim file.

4. Investigation

4.1 **Adjuster assignment.** Within 2 business days of FNOL, a **file owner** is assigned: Desk Adjuster (DA), Field Property Adjuster (FPA), or Auto Damage Appraiser (ADA).

4.2 **Inspection.** On-site inspection scheduled within 5 business days for property; auto may use virtual photo estimate for minor damage under $3,500.

4.3 **Coverage review.** Adjuster verifies policy version, endorsements, deductibles, exclusions, and peril triggers (e.g., sudden vs gradual water per H-100 Section 5.3).

4.4 **Independent experts.** We may appoint hydrologists, engineers, biomechanics consultants, or fire investigators at our expense when coverage or causation is disputed.

4.5 **Interview.** Recorded statements may be taken from insureds, drivers, and witnesses.

4.6 **Fraud referral.** Files with inconsistent timelines may be referred to Special Investigations Unit SIU-DEMO; cooperation is required under policy conditions.

4.7 **Engineering hold.** Foundation infiltration claims are placed on engineering hold until ER-FND or soil report SR-22 is received when territory rules apply (H-100 Section 10.5).

5. Review and Decision

5.1 **Coverage determination letter (CDL).** Issued within 15 business days of complete FNOL unless catastrophe or engineering hold extends timeline.

5.2 **CDL contents.** Covered perils, applicable exclusions, deductibles, reserves, and next steps.

5.3 **Partial denial.** If part of a loss is excluded (e.g., gradual mould excluded but sudden pipe burst covered), CDL explains allocation methodology AL-METH-2.

5.4 **Multi-policy coordination.** Liability from auto may pay third-party bodily injury while property handles garage structure under H-100; reserves are not duplicated.

5.5 **Payment authority.**

5.5.1 Repairs: payment to shop via fictional direct repair network or to insured.

5.5.2 Total loss auto: ACV plus taxes minus deductible.

5.5.3 Additional living expense (if H-100 endorsement **H-ALE**): advance payment after 72 hours displacement.

5.6 **Closing.** File closed when payment issued and releases signed; reopened if supplemental damage reported within 12 months with new evidence.

6. Communication Standards

6.1 Status updates at least every 10 business days while investigation is open.

6.2 Language of service: English or French upon request in fictional bilingual regions.

6.3 Authorized representatives require written **AOR-1** form.

7. Appeals and Disputes

7.1 **Internal appeal.** If you disagree with coverage or amount, submit **Appeal Form AP-200** within 60 days of CDL with new evidence.

7.2 **Appeal review.** Senior adjuster (not original file owner) responds within 20 business days.

7.3 **Ombudsman.** Unresolved disputes may be escalated to ABC Assurances Ombudsman Office (fictional) per H-100 Section 10.3.

7.4 **Mediation and appraisal.**

7.4.1 Property repair amount disputes: appraisal per AP-PROP-4 (two appraisers + umpire).

7.4.2 Auto repair disputes: AP-AUTO-7 referenced in A-300 Section 9.4.

7.5 **Arbitration** only if fictional optional clause ARB-1 was purchased on Declarations.

7.6 Appeals do not extend statutory limitation periods in real law; here all deadlines are fictional for classroom use.

8. Appeals Evidence Checklist (Summary)

8.1 Contradictory expert reports with credentials.

8.2 Time-stamped photos showing progression of damage.

8.3 Weather data from fictional bureau W-API for sudden vs gradual arguments.

8.4 Complete contractor scope distinguishing rebuild vs cosmetic.

9. Special Claim Types

9.1 **Total loss home** with mortgage: payment may include fictional lender clause.

9.2 **Theft** with no forced entry: SIU review per H-100 theft conditions.

9.3 **Ride-share auto** claims require trip log matching **A-RSH** endorsement.

9.4 **Sewer backup** claims require proof of **H-WBU** and maintenance log for sump if applicable.

10. Records Retention and RAG Demo Notes

10.1 Claim files are retained 7 fictional years for training audits.

10.2 Documents indexed for RAG should include policy form, endorsements, FNOL transcript, photos metadata, CDL, and appeal outcome.

10.3 **Educational disclaimer.** Procedures mirror industry practice in outline only; numbers and forms are invented.

11. Clause Cross-Reference to Policy Forms

11.1 Water reporting: Section 2.2.1 with H-100 5.2, 5.3, 6.2.

11.2 Auto hit-and-run: Section 2.2.2 with A-300 7.7, 11.

11.3 Deductibles: Section 5.5 with H-100 5.6 and A-300 Section 8.

11.4 Liability coordination: Section 5.4 with A-300 5.5 and H-100 Coverage E.

12. Glossary (Claims)

12.1 **FNOL** — first notice of loss.

12.2 **CDL** — coverage determination letter.

12.3 **Reserve** — estimated ultimate payment on file.

12.4 **SIU** — special investigations unit.

12.5 **Subrogation** — recovery pursuit against third parties.

13. Timetable Summary (Business Days, Fictional)

13.1 FNOL acknowledgment: same day automated, human within 1 day.

13.2 Adjuster assignment: 2 days.

13.3 Property inspection target: 5 days (excluding catastrophe).

13.4 CDL target: 15 days from complete FNOL.

13.5 Appeal response: 20 days from AP-200 receipt.

13.6 Catastrophe CP-9 may double inspection interval but requires public notice on portal.

14. Quality Assurance (Educational)

14.1 Random file audits sample 5% of closed claims for documentation completeness.

14.2 RAG demo environments should index CDL and exclusion paragraphs with policy version IDs for retrieval tests.

14.3 Document ID **ABC-POL-CLAIMS-2026-001** version **1.3.0** aligns with H-100 2.1.0 and A-300 2.1.0 for cross-reference drills.

15. Escalation Matrix

15.1 Desk Adjuster to Field Property Adjuster: damage estimate exceeds $50,000 or engineering required.

15.2 To SIU-DEMO: inconsistent FNOL, prior fraud flag, or high-theft item with no signs of forced entry.

15.3 To Legal (fictional): third-party fatality or coverage counsel opinion on ambiguous exclusion.

FICTIONAL — FOR EDUCATIONAL USE ONLY. ABC Assurances claims procedures are not operational in the real world.
